001 E-Mail
 Name :
 One-Touch Name :
 E-Mail Address :
 Divide Data

Type dropdown menu options: E-Mail, E-Mail, I-Fax, **File**, Group

- Can insert details here
NAME: staff name
ONE-TOUCH NAME: staff name
HOST NAME: \\PCNAME\FOLDERNAME

The screenshot shows the 'Address Book' application window. The title bar reads 'Address Book' and 'Mail to System Manager'. The breadcrumb path is 'Address Book > Address Lists > Address List One-Touch > Register New Destination: File'. The main area is titled 'Register New Destination' with a timestamp 'Last Updated: 02/08/2019 17:08:30'. Below the title is a message: 'Set all the items, then click [OK]. You cannot click [OK] if some items have not been set.' There are 'OK' and 'Cancel' buttons. A 'Type' dropdown is set to 'File' with a 'Set' button. Below this is a section for '001 File' with the following fields:

- Name: STAFF NAME
- One-Touch Name: STAFF NAME
- Protocol: Windows (SMB)
- Host Name: \\PC_NAME\FOLDER_SCAN_NAME
- Folder Path: (empty)
- User Name: STAFF NAME (Max 128 digits (Max 24 digits for FTP))
- Confirm Before Sending
- Password: (empty) (Max 24 digits)
- Confirm: (empty) (Max 24 digits)

- Click OK to save
